Monico Asset Gateway

Industrial Protocol Translator

Monico's Asset Gateway is a pre-configured solution for networking, protocol conversion, data logging, asset management, and data visualization. This device can be utilized in a variety of applications with equipment from various manufacturers.
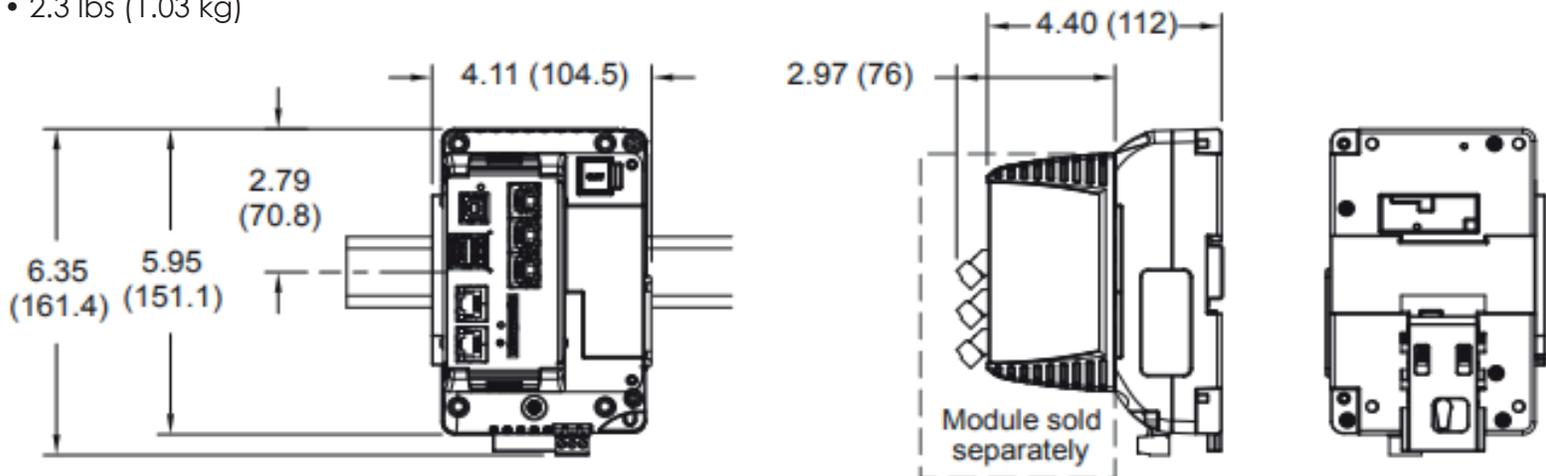

Features & Benefits:

- Communicate with over 300 Major Industrial Protocols including Allen Bradley, BACnet, CAT® Data Link, Modbus RTU/TCP, S.A.E. J1939, SNMP, and DNP3
- Support up to 18 Simultaneous Protocols
- Web Server for Remote Monitoring & Data Visualization
- Email Notification of Alarms and Shutdowns
- Direct CDL to S.A.E. J1939 Translation
- LED Indicators for Power and Communications
- Real-Time Data Logging
- Scalable Modules & Expansion Options
- "Plug & Play" Operations
- Automatic Engine Detection and Configuration
- Free Access to MonicoView™ Software for Field Settings

Specifications:

- -40° to +70°C Operating Temperature
- -40° to +85°C Storage Temperature
- Shock and Vibration Resistant
- IP20 Rated
- CE, UL/cUL and UL/cUL Hazardous Approvals
- IECEx UL 15.0035X Certified
- 10-30 VDC Input Voltage
- 6.35" x 4.11" x 4.40" (16.2 x 10.5 x 11.2 cm) Dimensions
- 2.3 lbs (1.03 kg)

Supported Industrial Datalinks:

- (1) RS232 Serial Port
- (2) RS422/485 Serial Port
- (2) 10/100Base-T(x) Ethernet Ports
- Optional CAT® Data Link and CANbus Ports

Module sold separately

your machine. your data. your way.

SIMPLE SOLUTIONS. POWERFUL MONITORING.
